

## VPS Hosting

You have four options to host your new website on our new and powerful VPS servers in USA or EUROPE datacenters.

### **Option 1: Cloud VPS (Almost 100 % uptime, no hardware issues)**

*VPS-3000HA-S*

*RAM: 8GB*

*Storage: 260GB on SSD*

*Bandwidth: 6TB/mo.*

*IP Addresses: 5*

*Full License of cPanel/WHM*

### **Cloud VPS Features:**

Our VPS plans come with **cPanel+WHM** included and preinstalled for free! (\$425/yr value)

Our VPS plans are now **High Availability** - (HA-S)! Your data is instantly written to a 3-server cluster. If your VPS node were to fail for some reason, it instantly reboots within 30 seconds onto a sister server within the same cluster for virtually no downtime!

Our VPS plans come with a **live-state Snapshot** feature which takes an exact replica of your VPS server including all running processes and allows you to revert to this point at any time during your development process.

**Unlocked CPU cores:** Some hosts dedicate 1 or 2 cores to a VPS account, we don't. All the CPU of the server is technically available to the customer. As best we can, we let VPS customers utilize as much CPU as they need. This means faster Simultaneous processing and less time waiting for tasks to be completed.

Support:

We include 2 FREE hours of **Launch Assist** to help you get transferred and set up correctly. This is 2 hours with our Systems Admin team called Advanced Support. They specialize in custom migrations, tuning the LAMP stack, and server optimizations.

For Free, We fully **manage** our VPS servers and this means we take care of

hardware+network monitoring 24/7, security patches, and we take care of updates to preinstalled softwares/services (we update cPanel+WHM, CentOS, Apache, etc)

24 Months - \$79.99/mo upfront at \$1919.

12 Months - \$89.99/mo upfront at \$1079.

6 Months - \$94.99/mo upfront at \$569.94

1 Month - \$104.99 on the 1st month
